At **Red Rock Business Solutions** we specialize in point of sale systems. Let us show you how to boost efficiency, accuracy and productivity. Our POS systems make it easier for you to focus on your business growth and success.

### **Simplify the Daily Management of Your Business**

As a business owner or general manager, have you ever wished there was a system that would simplify your “End of the Day” procedures and produce sales reports at just one touch of a button? Our system will provide the simplified daily closing procedure you have always wanted...and there’s more! Instead of spending hours matching paper guest checks to cash register receipts or preparing awkward closing procedures that never seem to add up, our system allows you to generate a daily closing report for any given date with the touch of a button. This easy to use POS technology will work for all your staff regardless of computer knowledge or experience. In less than a few seconds, you will have a closing report for the specified date. It will show you all the detailed sales information, as well as other numerous activities including recorded voids. Save yourself the tedious step of going through the day’s tickets by hand? Our System will help you organize, record and document the day’s financial activity easily and effortlessly in no time.

### **Cut Your Losses**

Our system uses roll paper as guest checks which can save thousands annually. you will also have the ability to strictly enforce time card activities. You may experience overall cost savings from significantly reduced mistakes, thefts, and much more.

### **Track Vendors**

Our System helps you identify costs savings by showing your vendor price history. Our purchase order feature allows you, at one glance, to review what you have been charged by various vendors in the past.

### **Transform Your Business Atmosphere**

A modern POS system will add greatly to the atmosphere of your business environment. Customers DO pay attention to your new fixtures and atmosphere. In addition, the guest check that you present to your customers will show purchases and other information clearly without compromise. Your customers will no longer see your hand written tags or scratch marks. You may also include sales promotional messages on your guest checks. The improved, more memorable atmosphere of your business will increase your customer loyalty and build your reputation in the community.

### **History**

Our system will allow you to track historic information right in the software. You can track sales history, customer history, vendor history and employee history.

## **For Restaurants**

### **Better Communication with Kitchen**

Do your servers rush from the kitchen or bar to submit orders? With the Aldelo POS System all ordered items are correctly routed to the appropriate remote kitchen or bar and orders are printed automatically. Eliminating foot traffic and communication errors with the kitchen. This will save your servers time and prevent kitchen prep mistakes.

**We are proud to partner with...**

**for your restaurant, retail, and Salon POS software needs.**
